- The drawing is a technical plan view of a road project. It features a central road alignment with various engineering details. Key elements include:

  - Curves and Stationing:** Several circular curves are defined with their respective radii (R) and lengths (L). For example, W-10 has R=150 m and L=5,011°, while W-11 has R=200 m and L=5,392°. Stationing points are marked along the alignment, such as P.t.K. Km 0 + 504,30 and K.t.K. Km 0 + 517,42.
  - Elevations and Slopes:** Numerous elevation points are shown, ranging from 230.5 to 247.1. Slopes are indicated with values like 1:10, 1:12, and 1:15.
  - Infrastructure:** The drawing shows the intersection of the road with existing infrastructure, including a railway line (indicated by a dashed line with cross-ticks) and a canal (indicated by a line with cross-ticks). A green hatched area represents the project's boundary.
  - Annotations:** Various text annotations provide specific data, such as "KONIEC OPRACOWANIA" (End of work) and "32" (a circled number).
  - Legend:** A legend at the bottom left defines the symbols used: a green line for "granice własności" (property boundaries), a green rectangle for "proj. droga do pól o naw. asfaltowej" (project road to fields with asphalt pavement), a dashed line for "proj. krawężń jezni" (project curb of the road), a blue line for "32" (numbers of the distance under the investment), and an orange line for "granicę terenu niezbędnego dla realizacji inwestycji" (boundary of the area necessary for the implementation of the investment).
